

How to start using:

1. Download AIRtimer app from the store. Search “**AIRtimer**” or press on direct link:
- For **IOS** devices <https://itunes.apple.com/app/id1476406234>

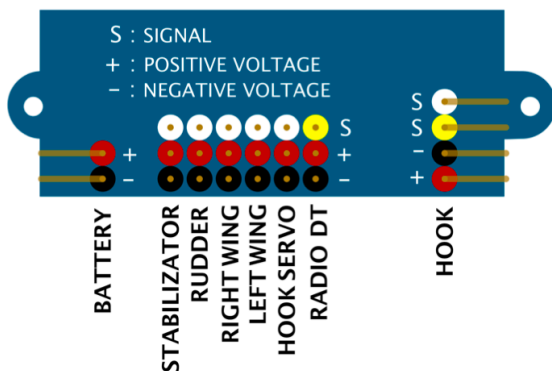

2. Connect timer outputs

ATTENTION:

Hook must be connected.

RadioDT is constantly on (You can interrupt flight at any time).

Use this pinout for connecting:

3. Pair timer with app:
 - 1) Turn timer on while holding the hook in a forward position
 - 2) Hold the hook for 2 seconds till a long beep, then release
 - 3) Open **AIRtimer** application
 - 4) Press «+» button to add a timer
 - 5) Press «Pair» button after the program finds a timer
 - 6) Enter a model name and press “Done” button
